

BWF RESEARCH GRANTS

BWF provides the opportunity for research institutions and individuals to apply for research grants to assist in the funding of applied sport science research in badminton.

The BWF Sport Science Commission has three key goals and the research grants assist in achieving these goals:

1. To encourage and widen interest and investment in applied research in Badminton.
2. To improve the level and quantity of scientific material available to players, coaches and badminton practitioners.
3. To contribute towards the increased knowledge of performance and safety at the international level – of coaches and players.

The BWF has a research grant budget of USD 70.000 for 2018 - 2019 grant applications.

Individuals and institutions can apply for a grant to assist in their research projects in badminton. In this year's funding, BWF are particular interest in research connected to the **health benefits of badminton and injury prevention.**

Grant applications may come from institutions or individual academics conducting research in any of the following areas relevant and specifically applicable to badminton: physiology, biomechanics, sports psychology, performance analysis, match analysis, high performance pathways, sports anthropometry, sports injuries / injury prevention, or other areas as agreed by the Sport Science Commission.

For more information about the BWF Research Programme and the research grants application process, please visit: www.bwfeducation.com/bwf-research

Application process will open on Monday 04 June 2018.
